

Merlin Willcox is a General Medical Practitioner and Academic Clinical Lecturer at the Department of Primary Care and Population Sciences at the University of Southampton, with interests in the care of vulnerable people, global health, and traditional medicine. He has researched different aspects of primary health care in low-income countries, with a particular focus on malaria and traditional medicines. He has been involved in several clinical trials of herbal medicines in Uganda, Madagascar, Mali and the UK and coordinates the RITAM network (Research Initiative on Traditional Antimalarial Methods).
